

POLI 9430: International Political Economy

Fall 2019 Syllabus

Instructor: Heather Ba

Email: bah@missouri.edu

Time: Tuesday 6-8:30pm

Class Room: Professional Building 104

Office Hours: T; 3:30-5:30pm, and by appointment

Office: Professional Building 302

Textbooks:

International Political Economy, Thomas Oatley 2019 (6th edition) is highly recommended but not required

Other readings will be posted on Canvas

Course Description & Objectives: This course is designed to introduce graduate students to central issues in the field of international political economy. Be aware: it barely scratches the surface of issues and topics that political economists currently research and publish on (hence all of the 'other readings' listed on the syllabus). Some topics, such as sovereign debt and institutional design, are left off entirely due to time constraints.

This course begins by exploring the concept of political order, which is the central problem of international relations. Students will read the research of early IPE intellectuals who laid the foundation of modern political economy by asking big, important questions regarding the relationship between international order and the nature of international cooperation on economic issues.

Next, the course situates the issue of economic relations between countries as an important dimension of international order, and considers how the structure and pattern of economic relations between and within countries might affect international cooperation on a range of economic issues: monetary regimes, trade, capital account liberalization, foreign direct investment, regulation of international corporations, economic development, and financial stability. The majority of the syllabus focuses on the unique economic characteristics of the contemporary, liberal, American-led order. The syllabus concludes with a discussion of economic challenges to the contemporary international order.

At the end of this course, students should be able to think more analytically about social, political, and economic phenomena that occur in the international system. Students should have an expanded knowledge base of international economics and international politics, and they should be able to apply contemporary theories that attempt to explain political and economic phenomena.

Assignments:

Three Reaction Papers (30%)

Discussion Leadership (x2) (20%)

Discussion Participation (10%)

Your Choice of Final Research Paper or Mock Comprehensive Exam (40%)

** Coauthored papers are welcome and encouraged*

Course Technology: This course website is on Canvas. It will be used to post the syllabus, required readings not found in the text book, and other course information and announcements in an easily accessible location. Please be sure to let me know as soon as possible if you have any issues logging into the website.

Email Etiquette: Please use email judiciously and professionally. First, ask yourself if your question is appropriate to ask over email. Can you find the answer on the course syllabus or website instead? Reserve email for questions of clarification; office hours are for help with substantive questions. Please maintain reasonable expectations about response time; I try to respond to all emails within one business day. Do not expect a response over the weekend. Finally, be specific about the subject of the email in the mail subject heading and use proper spelling, grammar, and punctuation.

Measurement of Progress & Grading Scale: While Mizzou still employs letter grading for graduate courses, I prefer to use a less fine-grained grading scale, e.g. high pass, pass, and low pass. I reserve low pass grades, which equate to a B, for students who do not adequately participate in class, fail to complete assignments or display poor decorum, e.g. not displaying maturity or common courtesy when participating in academic discussion and debate. This grade will usually also result in additional correspondence with the Director of Graduate Studies regarding the reason for the grade.

Attendance, Electronics, & Discussion: Your attendance in class is important both to your ability to master the material as well as to improving the quality of class discussion. If you miss three or more lectures without prior notice and valid excuses, you will be expected to drop and repeat seminar in the future. Discussion is central to a successful graduate seminar. I expected every student to help plan for two class discussions, and to participate actively in discussion and debate.

Student Feedback: I take my job as an educator very seriously, and want this course to be informative as well as fun. If something isn't working for you, I want to know about it. Everyone has different learning styles, and while I try to incorporate different teaching techniques to accommodate many types of learners, I believe teachers can always improve through feedback of their students. The sooner you come to me with questions, confusion, or frustration, the sooner I can find new ways of making class time most productive.

Course Schedule: Please note that I reserve the right to make changes to the course schedule, including quiz dates (excluding the officially scheduled final exam), when unforeseen circumstances occur. These changes will be announced as early as possible so that students can adjust their schedules. The links for supplemental materials can be found on Canvas.
